

News From Your TOWN HALL

"Boss I hear the quarters is gonna be wide open and I want a place up there it's the time being sung by one dusky citizen, and probably conveys the idea of a lot of white citizens at the new administration."

It's still our belief that the new Commission is just as moral as the old—it wants a decent, self-respecting citizenry white and black, as anyone. There's a slight difference of opinion as to how is best to accomplish that.

The old way didn't get results—that it didn't lessen the violations of the moral code; it did not remove an excess of immoral advertisements from the streets; it didn't lessen crime, and it didn't get rid of gambling, illegal liquor selling and the crowd of hangers-on.

We will see another approach to the question—and we believe a more practical way to lessen illegal activities and make the streets of Belle Glade, white and black, more safe for respectable citizens.

The Fire Department has been given back to the Fire Chief with supervisory discretion in the hands of the Commission; under the Commission, there are no longer any applicants for the police job here by men of experience and good records, to be settled, probably, but the time this goes to press.

The matter of a City Manager has not been openly discussed, which means probably not seriously discussed, for we are promised that city affairs will be discussed in open meetings.

Mari Pits For Road Materials Reported Under Water

County Commissioner Paul Rardin, of the Glades district, said a sad song to sing to his fellow commissioners at the Board meeting Monday, but it got returns. Paul told the members that with the Glades A. Duda's farm work that will be done over again, losses of crops in the ground, which must be replanted and delay in work and crops all add up to a rather discouraging and expensive picture.

But, in accord with his usual stamina, that old spirit of try, try again, prevailed in his mind circles and his eyes, and tractors are all again humming in the field.

In those sections where pumps were available, most of the water has been removed from the lands but those lands outside the drainage district still are inundated with the high waters and a little more work is being done.

The lake level still remains up around the 16.50 mark and the canals have shown little reduction in the burden of water.

It will be at least a week or ten days before all lands are dry enough for work. The St. Lucie lock gates were opened by the Army Corps of Engineers on Friday for emergency purposes.

Report made to the Agricultural Extension Bureau showed about 600 acres of beans had been planted last week and possibly more than that acreage the past week. Potato planting is going on briskly, as is also the planting of the seed beans.

Hundreds of people have come into the Glades in anticipation of a good season's employment and of the two Belle Glade camps are already engaged, with standing room only for those who may have trailers, who expect to be exclusively employed in agricultural work.

Those interested in farm labor problems for the coming season held a conference at West Palm Beach recently and after it ended, those present knew just exactly as much about the possible source of farm labor problems as when they went into conference and that was practically nothing.

However, it is known that the present labor agreement and wage settlement between the Federal and British governments in regard to the employment and pay of labor ends with the last day of December. What will occur or exist then depends upon the action of the Government and Congress. There may be foreign labor available or there may not be. It is not possible to predict the ranking pressure labor groups get the agricultural and labor are doing all in their power to improve the situation in the country, so as to give work to our own people, especially veterans returning from war, and they may have sufficient influence and power to bring such a condition about.

The local Farm Extension office, continued on page 6

Two types of farmers are eligible for payments in the Everglades area. First, those farmers who have planted some type of cover crop in the Glades area, this cover crop would very largely be Sebania or Egyptian

Detour To School To Be Built Soon

Through efforts of private citizens Elgin Bayless, Chairman of the Road Department has authorized the construction of a road to be removed from the detour for the building of a detour from the Pahokee road directly into the athletic field where it will connect with a road already built to the school buildings.

The County Commissioner, Mr. Rardin, and the City Street Commissioner Mr. McDonald, have arranged for the surveying of the route, the hauling and spreading of the rock.

This action removes a major danger to children going to and from school.

Pushing Ramie Plant
Trust Brothers and Sands, contractors on the new ramie plant at the Prison Farm are pushing that project these days. All the plowing for the main building and now carpenters are busy erecting the frame structure at a rapid pace.

New Postoffice Assistant

Bird W. Bohannon, an native of Livingston, Tenn., and who has a number of years been connected in an administrative capacity with the Post Office at Buffalo, N. Y., has been transferred to duties at the new Belle Glade post office. Assistant to Postmaster George Farnell.

Farmers Back Planting Crops

Farmers in the Glades have had ten days now to capitolate their losses as a result of the hurricane and the aggregate amounts into startling figures. Loss of farm work that will be done over again, losses of crops in the ground, which must be replanted and delay in work and crops all add up to a rather discouraging and expensive picture.

But, in accord with his usual stamina, that old spirit of try, try again, prevailed in his mind circles and his eyes, and tractors are all again humming in the field.

Belle Glade Is Placed On Federal Post Office List

Borchardt New Chapter Chairman. Many Projects Slated For Action

The Board of Directors of the Belle Glade Chapter of Commerce met at the Conservancy District office on Thursday and same proved to be a very animated session which foretold more than usual activity during the coming current year.

The new president, Milton Campbell, presided over the organization meeting which resulted in the selection of the following officers: Chairman, Eugene H. Borchardt; Vice President, Charles Fontaine; Secretary, Albert Patter; the latter at a \$20 a month salary. Charles

Three members of the old City Commission, who were elected to the new Commission, were: Milton Campbell, Eugene H. Borchardt, and Charles Fontaine.

The new Commission met on Wednesday night. Those attending were Messrs. J. K. Baker, Lonnie Warren and W. P. Risk, and those being inducted were Messrs. George Taylor, Sr., Lester Puckett and D. C. DeHaven. The new members were chosen by the old Commission, which was then dissolved.

The old Commission had the minutes of its last meeting read and approved and then adjourned, after having served an extra two weeks by request of the incoming members.

The new Commission then proceeded to organization, with Commissioner McDonald acting as temporary chairman and as a result of such preliminary work, the following officers were chosen: Mayor and acting Police Magistrate, George A. Taylor, Sr.; Chief of the Fire Department, L. E. Will; all city employees were held over until further notice of the Commission.

Mayor Taylor, in the capacity of Commission Chairman, named E. H. McDonald as acting Mayor and acting Police Magistrate, George A. Taylor, Sr.; Chief of the Fire Department, L. E. Will; all city employees were held over until further notice of the Commission.

There being some matters concerning the appointments for the Fire and Police Departments, the Commission decided to hold a closed session for consideration of the same.

The secretary read letters from Congressman Dwight Rogers and Postmaster George Farnell, stating that Belle Glade had been placed on the list of towns and cities who will be eligible for the construction of Federal buildings, but that action would await congressional legislation and appropriations.

High Water Threatens Lake Harbor And South Bay Fall Bean Crop

Farmers in the Lake Okechobee vegetable growing area continue to be quite apprehensive as to the probability that the high water tables resulting from the rainfall immediately preceding during and since the storm will result in very short fall crops throughout the area.

In recent years the early fall crops have largely been produced on low lands at an increasing distance from the high lands—near the lake—lands that are much colder and more subject to the frost hazard than are the islands and the mainland adjoining the lake. It is on these lands that the greatest loss of fall plantings occurred by the high water.

Nor has there been any cause for optimism.

Many Improvements Made In Local Plants

As one makes a trip through the pecking plants it is really amazing the amount of repair work that has been done and is still in progress. Machinery has been repaired and turned up, new mechanical equipment added, and pre-cooling units installed and improved. Several hundred people this week are busy cutting potatoes for export.

The Florida East Coast is making considerable yard improvement east of the former Lord, Robin and Kesse plants, so as to give these plants independent switching tracks. Much work is being done over in the new railway terminal, now that the waters have receded, and the new plants in that sub-division will be well provided with their car track connections and switching operations.

Will Erect Business Block
Contractor R. E. Lowery, who is erecting the new Rader block on Avenue A has taken over a similar contract for the erection of a one story, block and cement structure, for the Penno's which will be used by the latter for their ice cream plant and retail store. The new building will be located just east of the new Howell Bros. building near Avenue A. The Penno's have had a stand on the new site of the Scarborough block.

And Green Cove Springs, Fla. I have been very lucky in not being sent far from home, but haven't been back to the Glades since entering the Navy. So hope to visit there real soon. Oh so the places I have been I still prefer Belle Glade.

"Have been receiving the Herald weekly and want to thank who ever is responsible for the paper's homecoming newsman so much when you are away."

CLIFFORD ALLEN BA 2c
Mr. and Mrs. W. C. Allen of South Bay have just received word from their son, Clifford, that he was promoted to the rank of Boatman's Mate and will be on duty on the USS. He was sent aboard ship at Manila Bay and sent his parents souvenirs, shoes and a fancy fan that he picked up while in port. He wrote that they were leaving immediately under combat conditions with troops and cargo to the Philippines and to Tokyo.

Lynagren Gulf and on to Tokyo. He mentioned that the people there were very small and many of the women constantly smoked black cigars.

TSGT. J. B. JONES
Tech Sergeant Jones who is stationed at Dow Field, Bangor, Maine, is receiving his discharge this week and expects to arrive in Belle Glade soon. He was married on September 23rd and will be accompanied by his bride.

JOHN S. DANIELS
A discharge has just been given to John S. Daniels, Chief Mate, USN, moved into Tokyo Bay aboard a Marine search plane shortly after Japanese surrender documents were signed. The crew will remain with the ship's company, now crewed by the Japanese.

W. M. A. RAWLS, AMM 2c
William Rawls, Machinist Mate, USN, moved into Tokyo Bay aboard a Marine search plane shortly after Japanese surrender documents were signed. The crew will remain with the ship's company, now crewed by the Japanese.

Experts Try Out DDT In Local Experiments

Earl Dixon, entomology research man at the Experiment Station, assisted by Lawrence Hughes, tried out several experiments with DDT this week and report most excellent results with both the dusting with DDT as well as with the liquid spray, using a plane for the work.

On Monday night when the mosquitoes were the thickest, and nearly eating up humans and animals, they dusted the Station grounds and buildings and on Tuesday night there was not a biting bug to be found in the area, which showed that the insecticide was effective. In this test they used a 50 per cent dust combination of DDT, 10 pounds of the dry chemical mixed with 90 pounds of chalk dust.

The second test was the spraying of the farm cattle out in back fields where one gallon of spray emulsion to thirty gallons of water was used. This test showed that the cattle were not molested by mosquitoes to be found. Further tests will be made at Okeechobee camp and the High School grounds.

Mr. Hughes has been perfecting himself in the technique of using both the dust and liquid DDT and has given fine service on the Station experiments.

Appoints New Members To Fire Control Board

Governor Millard Caldwell the past week made new appointments on the Everglades Fire Control Board and C. M. Green of Belle Glade, is one of the new members added to the board who takes the place of A. B. Bell, who has assumed other duties on the State Advertising Board.

Other members named were as follows: H. S. Borchardt, J. B. Pierce, S. R. Baisley, Okechobee, J. O. Bishop, P. Pierce, E. M. Connett, Cleveland, W. B. Norton, Venus, O. D. Hathorn, Indianapolis, and J. B. Jones.

Members from Collier and Monroe counties are still to be named. Guy Bender is the district fire chief working under the board with headquarters in Belle Glade.

Attended Ford Convention

Blitz Wegman of Cleveland, Charles Bolton of Belle Glade, and B. Elliott of Pahokee, spent a portion of the past week at the Ford headquarters in Jacksonville, where they had opportunity to attend the state salesmen's convention and a preview of the Ford line of trucks and passenger cars of the post-war designing. These dealers had expected to have given Glades people a preview of some of the new models, but the strikes in Detroit have made this impossible for the immediate future.

Building Up Dykes

As a precautionary move the Van Landingham Bros. and the Borchardt corporation have a crew of men raising the banks of the Hillsboro canal to prevent possible inundation of the lands as the waters of the canal are becoming threatening.

Odd Fellows Plan For New Lodge At Belle Glade

Preliminary steps were taken at a conference at the Carpenter's hall, Sunday afternoon between West Palm Beach and Belle Glade Odd Fellows looking forward to the formation of a new lodge in this city to serve the Glades and Glades lands with a tentative name of Glades Lodge.

The outcome of the conference was that on Sunday afternoon October 7th another meeting will be held here at the Carpenter's hall, where a single piece of equipment which can be used on the soft mud lands but which has to be subjected to mechanical changes to meet local conditions. That this field is most prolific in its purchases of such equipment, in the way of drag lines, tractors, bull dozers, plows, mole drainers and a myriad of other articles.

OBSERVATION and Comment
By John M. Gladhill

Am informed that the Everglades farming section uses more mechanical machinery in the farm program than any other section of the United States. Also that there is no single piece of equipment which can be used on the soft mud lands but which has to be subjected to mechanical changes to meet local conditions. That this field is most prolific in its purchases of such equipment, in the way of drag lines, tractors, bull dozers, plows, mole drainers and a myriad of other articles.

It is amazing the amount and size of the road equipment which the Belcher Oil company is bringing in to operate on its road contract. Am told that they have trucks which will haul 15 yards of rock or muck at one trip. Its big rock muck over on the rock pit is muck at one trip. Its big rock muck over on the rock pit is muck at one trip. Its big rock muck over on the rock pit is muck at one trip.

Fire Prevention Is Your Job

As the man on the street watches the fire engine roar by with the siren going, he is more apt to get a thrill than a chill from wondering whether it is his home or the place of business where he works that may be on fire. Every day countless people have to hunt new homes or new places to work because they were "burned out."

At this particular time, when reconversion is just getting underway, a fire can be particularly disastrous to employment, for two reasons: Plants are still hard to replace; and with much uncertainty about the use of surplus government properties, there may be justified hesitancy about rebuilding. So anything that can be done to avert a fire, help prevent unnecessary unemployment or moving, with resultant loss of earnings or savings.

Fire prevention is a highly personal problem which can save more than fire fighting. Every man or woman who lights a match or smokes a cigarette should strive to be conscious of the fact that such articles are extinguished before they leave their fingers. Every person using heat-producing electric or gas equipment, should be sure it is out before leaving it. Every person tending a furnace or a stove, or handling gasoline or any other inflammable material, should be constantly alert to the danger of fire, and cause each of their acts to be one of fire prevention, instead of fire carelessness.

If individuals would make themselves responsible for fire prevention, much loss and suffering could be averted during the reconversion period, which no fire department or no fire insurance company can eliminate.

Taxation Dominates Our Future

The prosperity of the United States and its future as a free nation are inseparable from taxation. Business knows this and individuals are slowly becoming aware of it.

In a recent statement, John G. Byler, Treasurer, W. T. Grant Company, and Chairman, Committee on Taxation, American Retail Federation, said: "We as retailers fight for tax laws which encourage production and the largest possible national income." He pointed out that retailers should work for five general taxation principles:

1. The Federal budget should be in balance and there should be a gradual reduction in Federal debt.
2. Income taxes should be the primary source of revenue and there should be no general Federal sales tax at any level.
3. The bulk of income taxes should be secured direct from individuals rather than through a relatively high tax on corporation income.
4. Present excessive taxes should be repealed, with possible traditional exceptions.
5. Social security taxes should be kept apart from the general tax structure and the rate of these taxes so fixed that the receipts will be kept in balance with expenditures under the social security program.

"The transition period now beginning," Mr. Byler concluded, "is a dangerous one from the tax angle. What we must fear is a reduction in wartime rates leaving the existing hodge-podge of tax laws with their false doctrines which handicap the operation of a free enterprise system." And that is good, sound reasoning.

Coal Industry Conquers Obstacles

The fear of a coal shortage due to lost manpower, put this nation on its toes, and the various departments of government have at last been cooperating to see that the nation's coal mines are supplied with miners from the armed services as rapidly as possible. That is the American way of doing things—the people do not like shortages and have a habit of kicking them regardless of the obstacles to be overcome.

In addition to mining coal, the Bituminous Coal Institute is carrying on an aggressive campaign to show the people how to save coal by using it properly. It is emphasizing the fact that a very few dollars spent in the construction of a proper size chimney when one is being built, will return big dividends in more efficient and economical heating and fire safety. It is no saving to skimp on chimney size, which will choke a fire and waste fuel by not delivering its heat value.

This activity of the bituminous coal industry is typical of the constructive manner in which American business seeks to serve the public efficiently as the best method of building a sound future for itself. Under trying and abnormal conditions, coal has done a remarkable job in performing a major task in keeping the wheels of industry turning and the home fires burning during the worst manpower and equipment shortage in its history.

With cradle-to-the-grave "security" demands that are being persistently urged in many quarters, we are seeing the birth of a new national philosophy that would accept doles under a fancy name as a substitute for individual independence and freedom, plus occasional hardship.

MILLIONS OF DOLLARS EVERY
YEAR GO TO GOOD SUGGESTIONS!

CINEMATIC CHATTER

By Malcolm Miller

Sunday-Monday brings this
clever pair to the Everglades
Theatre in "Practically Yours,"
which is rated as one of the top
hotels coming in the year.

It is a honey of a show and
should be a great relief for those
who have been wanting to get

away from war, murders and
mystery dramas.

Tuesday-Wednesday brings a
double feature. First one up is
"High Powered" with Robert
Lowery, Pylis Brooks, Roger
Frye and many other well
known players. It is a construction
gang picture with the male
members cast as riggers on ha-
zardous work at a gasoline
cracking plant. It is loaded with
action.

Thursday-Friday I see Dun-
dell Wood, Elyse Knox teamed
and starred in a hilarious piece
under the title "Hi Ya' Sailor!"
which promises to be a laugh
producing opus of the first
bracket. A strong cast assist the

stars in putting across a fast
moving, musical, wise cracking
show that should please every
type of customer at the theatre.

Saturday the Three Mesqui-
ters move in, playing "Death
Valley Rangers" which is listed
as a well actioned Western.

See you at the movies—Mal.

MAKE YOUR CAR
SHIPSHAPE
FOR SUMMER
-SINCLAIR-ize

Making your car Shipsape for Summer
will save wear. Sinclair-ize service will
make your car Shipsape as its manu-
facturer recommends. You need this ser-
vice now, as never before. No new cars
are being made. So better not take any
chances. Have your car Sinclair-ized right
away.

SINCLAIR-ize SERVICE INCLUDES THIS:

To save wear on gears, transmission and differential
are filled with summer Sinclair lubricants. Special
Hypoid lubricant is used for Hypoid gears.

To save engine wear, crankcase is filled with
Opaline Motor Oil. It sands up, lasts so long it
saves you money. Sinclair Pennsylvania Motor Oil
if you prefer a 54 motor quart.

To save tires, tires are inspected for cuts and bruises,
inflated to proper pressure.

To help prevent accidents, front wheels are removed
and lubricated if your car manufacturer recom-
mends.

To help prevent overheating, radiator is cleaned of
anti-freeze, rust and sludge.

To save wear and help prevent squeaks, chassis is
lubricated with special Sinclair lubricant.

To give better performance, wear gasoline, spark
plugs are cleaned and adjusted. Battery and oil
and air filters are checked.

Immediate Outlook
for
Corporate Earnings

Termination of war contracts has come at a time of
the year which is highly advantageous for American
industry. For eight months of this year many corpora-
tions have accumulated large excess profits, of which
85 1/2% would have gone to the Government in taxes.

The expenses of reconversion will fall entirely or
largely in the final four months of the year, and therefore
can be covered by the excess profits earned in the first
eight months. To the extent that excess profits are avail-
able, the costs of reconversion will, in effect, be borne
85 1/2% by the Government and only 14 1/2% by the com-
pany.

Furthermore, if excess profits for the current year
are exhausted by reconversion expenses so that net in-
come falls below the normal base earnings, if a corpora-
tion may obtain a rebate from excess profits taxes paid
for the two preceding years.

Therefore, industry has two potent stabilizers for
the reconversion period of the next few months: (1) The
excess profits accumulated during the first eight months
of 1945, of which 85 1/2% would have been paid in taxes,
and (2) The "carry-back" provisions of the tax law under
which refunds are obtainable if earnings fall below the
normal base.

Most industries should be ready for large-scale
peace-time production before January 1, 1946. It is con-
fidently expected that Congress will eliminate the excess
profits tax at the end of this year. Therefore, industrial
profits in 1946 should not be restricted by an excess
profits tax ceiling which during the war took 85 1/2% of
all earnings above the normal base.

In view of the enormous pent-up demand for all
types of peacetime goods, and the huge sums which have
been saved by the American people during the past five
years, there is every reason to anticipate a high level of
business activity in 1946.

Our Firm is prepared to aid investors in planning
their investments to secure maximum benefits from the
Constructive Era ahead. We can suggest well balanced
programs in seasoned Bonds and Stocks yielding 5% to
6% and which should share in the Industrial Progress
of the Future.

V. V. WORTHAM, Prop.

Sergeant and Mrs. Clyde Clayton and baby daughter, Cynthia, were week end guests of Dr. and Mrs. R. L. Ringo.

Sergeant Junius Harris who is stationed at Miami Redoubt Station spent Saturday here with his Harris.

Mr. and Mrs. Frank Miller and family have returned after spending the past two weeks at Palm Beach.

Mrs. Kenneth Lutz who accompanied her daughter, Beverly, to Boulder, Col. to enroll at the University of Colorado, has returned home.

Mr. and Mrs. A. J. Pike and children, Richard and Veronica, have returned from Winter Haven where they visited relatives.

Bobby Greer, son of Mr. and Mrs. Lotie Greer, is home on leave from the U. S. Merchant Marines. His home port is St. Petersburg.

Miss Corrine Cohen left Saturday for Pittsburgh, Pa., where she will spend a three weeks vacation with her parents. She was accompanied by Mrs. Grace Wice, executive secretary of the American Red Cross in West Palm Beach.

Mr. and Mrs. D. C. DeHaven have returned home following a vacation at their former home, Marlborough, W. Va., and Cumberland, Md.

Mrs. Emmet Roberts returned here Monday and will resume her position at the P. C. Keese Packing House office. She spent the summer months with Lieut. Roberts at his base at Camp Campbell, Ky.

Ray Brown of Panama City is visiting his parents, Mr. and Mrs. J. F. Browne here this week.

Mrs. J. W. Lyons accompanied her son, Elmer and Roland Whitlock to Gainesville, Fla., Wednesday where the boys are entering Riverside Military Academy.

Frank Phelan, government inspector, returned here this week after spending the summer in the Southern States.

Pete Seauran who has been away all summer returned home Friday. Mrs. Seauran and daughter, Carol, remained at Daytona Beach.

NORMA WEEKS ENTERS BUSINESS COLLEGE

Miss Norma Weeks, daughter of Mrs. Josephine Farmer, has enrolled at the Walsh School of Business Science at Ft. Lauderdale for the opening semester where she will study commercial subjects.

Miss Weeks is a graduate of Belle Glade High, class of 1945, and has been employed at the Western Union Telegraph Co.

PAST PRESIDENT'S TEA AT WOMAN'S CLUB

A tea honoring their past presidents will be given by the members of the Woman's Club next Wednesday afternoon at 3 o'clock at the club building.

A musical program will be presented by Mrs. J. A. Murphy and hostesses are Mrs. Luther Jones, Mrs. J. O. Darden, Mrs. W. C. Bamford and Mrs. Roy Bair.

FONTAINE'S ENTERTAIN CATHOLIC SOCIETY

The September meeting of the St. Mary's Altar Society was held Tuesday at the home of Mrs. Inogene Fontaine at which time an election of officers was held. Mrs. Fontaine was elected as president for the coming year and Mrs. Robert Cameron was re-elected secretary and treasurer. An announcement was made that the October meeting would be at the home of Mrs. Cameron on Tuesday, the 9th.

The members are continuing their clothing drive for war refugees with the receiving center at Mrs. Joe Friedheim's home. A very inspiring spiritual reading was given by the hostess, followed by a social hour. Delicious refreshments were served by Mrs. Fontaine who was assisted by Mrs. Charles Fontaine.

OVERSEAS VETERANS HONORED AT PARTY

A dinner party was given by Mrs. J. D. Howington Saturday evening honoring Sgt. Janius T. Harris and Clyde Clayton, both of whom are veterans of the European Theatre. Other guests included Mrs. J. T. Harris, Mrs. Clyde Clayton, Mr. and Mrs. Hub Spooner, Mr. and Mrs. Jerry McKee and Mr. Dan Padgett.

BLESSED EVENT

Mr. and Mrs. H. S. Sewell are announcing the birth of a daughter, Dorothy Ann, September 21st at the Everglades Memorial hospital in Pahokee. Mr. Sewell is the manager of the drug goods department of Royals, Inc.

First Lieut. and Mrs. E. C. Powell are announcing the birth of a son, E. C. Jr., on September 6th at Ypsilanti, Michigan. Mrs. Powell is the former Mrs. C. E. Green, daughter of Mr. and Mrs. C. E. Green, now of South Bay. She lived here many years with her parents and is a graduate of Pahokee High School. Since her return from overseas duty Lieut. Powell is now connected with plane transportation at an Army base in Michigan.

School News

Pop Club met on Tuesday afternoon in the library for the purpose of electing officers. Mrs. Cherry stressed the point that unless all the season football tickets are sold there will be no Pop Club.

Those elected as officers for this year are President, Peggy Thompson; Vice President, Sue Cherry; Secretary, Dot Layfield; Treasurer, Joyce Berhardt; Publicity Chairman, Marian Matlock and Reporter, Louise Friedheim. A discussion was held as to the possibility of holding a dance in Pahokee after the Stuart game tonight.

ASSEMBLY

The students of Belle Glade High School held their first general assembly on Friday afternoon. Martha Ratley led the devotional exercises and pledge to the flag followed by Miss Alma Murphy accompanying the students as they sang "America." The high school band, which is starting on its second year, played a few numbers. Mrs. Bobby Allum, the director, reported that there are approximately 45 high school students, 45 elementary students and 45 students in South Bay, who are interested in hand work. The band has made lots of progress and this year they'll play for all our home games.

After all necessary announcements were made Mr. Hobson turned the program over to the Pop Club. The cheer leaders led the group in a few yells and songs for the game that night with Lake Worth. At the end of assembly the football squad, who had been having their pictures taken, came in and Coach introduced each player, told his weight and the position he played. The boys had on their new uniforms and they sure did look snappy.

ABOUT THE GAME TONITE

The local football boys have had scrimmages all during the week in preparation for the game with Stuart tonight at Lair Field in Pahokee. A lot of stress has been placed on offensive and defensive plays. There have been no injuries other than minor scratches and the boys should put forth the full strength of the team tonight. Wedgworth and Lloyd looked good on defense in the Lake Worth game last Friday night. Reeves, Harrell, and Leaflet's, all new men, looked good.

The probable starting lineup for the game tonight will be: McClatchey LE, Toot, T. M. Pike LG, McDonald C, Leathers RG, Mathews RT, Wedgworth RE, Harrell QB, Cherry HB, Reeves HB, Bearden FB. The Junior team under the direction of Coach Browning will play their first game with Conant of West Palm Beach here on the local field on Saturday. The Belle Glade band will accompany the team and play several selections during the game.

PARTY FOR ELMER LYONS

Elmer Lyons entertained a group of his friends on Sunday with a beach party to Lake Worth. Mr. and Mrs. Lyons chaperoned the party, who swam and went to the movies. A picnic lunch was served. Those attending were Elmer Lyons, Carolyn Freedlund, Joe Cherry, Dot Layfield, Kitty Knight, Norma Jean Armstrong, Ward Harrison, Jeanne Hooker, George King, Billy Bearden, Sue

Cherry, George Wedgworth, Peg. Continued on page 4

TWO REGIONAL FAVORITES

DIFFERENT AND DELIGHTFUL

RECIPE

• Beat 4 egg yolks and 1 cup sugar until thick. Add 1 1/2 cups cooked mango pulp, 1 cup lime juice, 1/2 cup salt. Cook in double boiler until thick. Add 1 cup lime juice and 1 cup undrained gelatin dissolved top. Stir until thick. Add 1 cup water. Beat until stiff. Add 1 cup cold water. Beat until stiff. Add 1 cup sugar. Cook. Add 4 egg whites beaten with 1 cup sugar. Pour into a baked 9-in. pie shell and chill. If desired, whip cream and use as decoration on top.

JAX has smaller 50¢ and 10¢ sizes. Contact your local JAX distributor for more information. JAX is sold in all states except Alaska, Hawaii, and Puerto Rico.

• Distinctly different, but each distinguished in its own way, Mango Chiffon Pie and golden JAX Beer are two regional favorites worth an appreciative audience!

• With a flavor distinctively brewed to please Southeastern tastes, JAX, the Drink of Friendship, is a delightful example of regional perfection.

• Alone, as a cheering refresher, or adding a gracious note to our famous regional food, JAX remains a premium brew, though you don't pay a premium price to enjoy its mellow goodness. Always ask for JAX!

SOUTH BAY BEAN CITY LAKE HARBOR

Coxsack R. A. Robertson, stationed in Miami, spent the week end with his family in South Bay.

Mr. and Mrs. Mark Challenor and sons, Mickey and Jimmy, returned Sunday evening from Hamilton, N. Y., where they spent the summer in vegetable production for earning area. They visited in Swainsborough, Ga., and Ft. Pierce en route home.

Mrs. Signe Burney, Mrs. A. B. Barnes, Mrs. Marvin Miller, Billy and Sue Miller, Mrs. Leiland Keene and daughter, Patricia Ann, made a trip to West Palm Beach recently for medical attention.

ARMY 2d E. Hardy and wife of Miami spent the week end in South Bay with their parents and Mrs. Hardy is remaining here this week.

T. Sgt. W. H. Willis and Mrs. Willis of Miami visited Mr. and Mrs. H. C. Willis and other relatives here last week. Sgt. Willis has just received his honorable discharge from the reconnaissance branch of the Army. He has been overseas in England for nearly three years and more recently in France. Mrs. Willis who served as Spanish interpreter in Miami during the war, has returned to civilian life. Mr. Willis plans to continue his studies in commercial art which were interrupted by his service and they will make their home in Miami. Mrs. Willis was Spanish instructor at the Palmetto High School before entering war work.

Gene Brown is a patient at the Cleveland hospital and is reported much improved.

Mrs. W. G. Byrd, who submitted to a major operation at the hospital in Orlando last week is reported recovering nicely and will be brought home in the near future.

Mrs. Oren Miller of Ft. Lauderdale visited Mr. and Mrs. C. H. Higgins and other relatives here last Saturday.

Mrs. Mable Fay Walker returned the first of the week from a business trip to Miami.

Lieut. and Mrs. W. M. Christensen of Coronado, Cal., are expected this week for a visit. Mr. Christensen is a member of the H. C. Willis and other relatives and friends in this vicinity. Mrs. Christensen was before her marriage, Lieut. Elsie Mae Willis.

Mr. and Mrs. L. L. Demoreau and son, Mike, of West Palm Beach were the Sunday guests of Mr. and Mrs. Alfred Vadatz.

Mr. and Mrs. Tommy Weathers and daughter, Judy, have returned home after an extended visit with relatives.

REVIVAL SERVICE
Revival services are being conducted twice daily from Monday through Saturday at the Baptist church in South Bay. Rev. C. A. Wattenbarger of Jacksonville is the visiting evangelist in charge of the services. Morning services from 10:30 to 11:30 are being held daily especially for those unable to attend the evening services at 8:00 p. m. each day.

The public is invited.

COMPLETES TRAINING

Coxsack Harvey R. Hodges U. S. N. has completed his training at San Bruno, Cal., for rank of Commander and is now awaiting assignment to duty. He has served in the Navy approximately by three years, 26 months of which was overseas in the Mediterranean Theater of War in Africa, Italy and France.

His brother, Pvt. Eldridge M. Hodges, who has been in training for the last ten months in Georgia, is now at Camp Adair, Oregon, awaiting orders to overseas duty. His wife and two children are living at Franklin, S. C. with her parents until his return from overseas.

REV. DAVID LYNN RESIGNS PASTORATE

Rev. David Lynn, who has served the South Bay Baptist church for the last year as pastor, has resigned his pastorate at this point to accept one in Alabama which he will serve while continuing his education for the ministry at a near by Divinity School. Resignation will be effective as of Nov. 2nd. Mrs. Lynn, the former Margarette Wood of Lake Harbor, will accompany her husband into his new work.

HIGH WATER THREATENS

Continued from page 1
for optimism as to an early drying out of many of these rich farming tracks. It is to be noted that water levels continue to rise in the Glades and that the water is running into the lake from the main drainage canals instead of towards the sea as it should. While the water in the pumping district canals is down in the ditches, it does not by any means mean that the water is under control even if the high land remains too wet to replant.

Louis Weiman who has been watching the water at Lake Harbor, states that the level of the Miami Canal has risen steadily since the storm as the water flows from the land into the lake. A point will soon be reached, he said, when the water reaches the high water mark at the highway bridge when the water will turn and flow again from the lake down the canal as it should. Then as long as the locks and hurricane gates remain open, any northwest wind will blow the water out of the lake down the canal to the Bole Canal and thence will spread out over the land, causing a new rise in water tables in the entire South Bay-Lake Harbor farming area below the pumping districts. Water cannot be drained off by gravity toward the sea because of the rock ledge down in the Glades which forms a natural dam to drainage and a basin in which the water gathers in times of heavy rainfall and high water such as at present.

Mr. Weiman believes that the locks and spillway should be closed and the water held in the lake until the Glades have time to dry out and the water be carried off by the main canals.

It has been pointed out that unless farmers depending on this flooded land for their fall crops can get the land dry enough to work and plant within the next month that it will then be too late to try for any tender crops as the frost season will then be too imminent to take a chance on planting. Since only the leafy vegetables will stand considerable frost can then be planted with safety, it seems reasonable to think that the snip bean crop will be very light in the Lake Harbor-South Bay area this fall and that most growers will have to wait for the spring crop on this land now covered by flood waters. Thus a one crop season seems to be indicated on large tracts of vegetable land for this year, unless by some miracle water should dry off much faster than is now expected.

Farmers in the Okaloosa area report that the water level is still rising there and that some of this rise is due to the water coming down the Bole Canal which seems to have cut Mr. Weiman's theory and to substantiate his idea that the locks and spillway should be closed at once, to close that source of future water table rises.

Harley Watson, who operates a plantation west of Lake Harbor reported the first of the week that the land on the lower end of his tract was 3 feet under water and that his pumps were making very little impression on it as water is still flowing towards this area from the Cleveland and LaBelle areas. Others in that general vicinity report a lack of water lying on their farming lands at present with no hopes of it coming out from under their crops.

SCHOOL NEWS

Continued from page 3
E. B. Barks, Corlie Cone, Elsie Ruth Harrell, Ray Hall, Ray Kent, Roger Cunningham and Louise Friedheim.
A swell time was had by all. Elmer left Wednesday to attend school at Riverside Military Academy in Gainesville, Fla. He will be a senior there this year.

DEMOLAY'S MEET

The Demolays met on Monday evening and elected the following officers: George Wedgworth, Master; Connelley, Jr., Cherry, Senior Counselor; Joseph Bass, Junior Counselor; and Frank R. Burt, Treasurer. The remainder of the officers will be elected at the next meeting. There were about 30 boys present and there were four Masons guests.

BOY SCOUT SWIM MEET

The Gulf Stream Council of the B. S. A. held a swim meet at the Lido Pools in West Palm Beach on Saturday. The Point walked away with the honors with 50 points. Belle Glade came in last 6 points.
Belle Glade came in second on the Medley Relay with Lee Burke, Rose Winne and Howard Connelley winning three points.

Buddy Friedheim won the other three points by coming in second in the breast stroke for boys under 110 pounds.
Tuesday night the Scouts held their weekly meeting at the Scout Hut. The Copperhead Patrol won the First Aid contest which was on "What To Do About Snake Bites."

A NEW ODD FELLOWS LODGE TO BE ORGANIZED IN BELLE GLADE OCTOBER 7th

Men who have already been contacted, and others who may be interested in the projected lodge, are invited to meet at the Carpenter's Hall, Sunday, October 7th at 3 o'clock.

Information concerning the order and organization will be presented at this meeting. Ray Whitlock, Edward Barbee and John M. Gledhill may be contacted concerning this new lodge project.

The Odd Fellows are an outstanding order in fraternal circles, with an outstanding record of over 125 years. It would pay anyone eligible under its regulations to be a member.

DR. MILES NERVINE

A BANKER appraises the South

THESE FACTS about the South are from a speech made recently in New York by ROBERT M. HANES, President, Wachovia Bank and Trust Company, President, Association of Reserve City Bankers, and past President, American Bankers Association and North Carolina Bankers Association.

Resources: The South produces 95% of the nation's cotton . . . 90% of the tobacco . . . 75% of the natural gas . . . 60% of the crude petroleum . . . 50% of the bituminous coal . . . 40% of the lumber . . . 47% of the wood pulp . . . 12% of the iron ore, and 26% of the electric power output. The South has 80% of the active cotton spindles and manufactures 90% of the nation's tobacco products and 26% of its paper and paperboard.

Industry: From 1900 to 1939, the value of the South's industrial production increased 700% as compared to a 366% increase for the states outside the South.

Agriculture: The intensified need for foods and raw materials has forced improved methods, diversification and intensive cultivation in agriculture. Farm mortgage debt has been greatly reduced and the farmer has learned new techniques and better farm management. In 1943, the South accounted for 40% of the national farm crop income.

Transportation: The South has 81,473 miles of railroads, 350,000 miles of modern highways, 21 airlines, and excellent ports, harbors and inland waterways.

Banking: In 1910, the South's banking resources were \$3,275 million; today they are \$23 billion. Savings deposits have increased from \$75 million to \$3½ billion, and life insurance in force from \$3½ billion to more than \$30 billion.

Pattern for Progress: The war production program has brought new and diversified industry to the South, developing a large supply of skilled labor. The South is a land of mild temperatures, ample rainfall, abundant sunshine and long growing seasons. Its people are not crowded together in large cities, but scattered in smaller cities and towns, where living and working conditions are more attractive. They are supported partly by industry and trade and partly by agriculture. This pattern fits perfectly into the current trend of dispersal of large industries.

OBSERVATIONS

Continued from page 1
ing. These big contracting firms have in their equipment most any type of machine which can be used to facilitate the completion of contracts and the Belcher company is no exception to this rule.

Farmers may have heard hard as the result of the recent hurricane, but their indomitable spirit of progress will not let them admit that they have been defeated. When they could ascertain the extent of their losses, they did not set down and pine, but instead put on their working clothes and boots and started work to repair the damages sustained and to plan for a crop, even though it be late in season.

That property owners and farmers are not at all satisfied with existing local drainage conditions was pretty conclusively demonstrated at the Water Control meeting here last week. Action and plenty of it was a demand for government action cannot very well deny, for these people are anxious to see dirt flying in improvement of canal waterway improvements. This subject has been one discussed for 50 years but not a great deal done about it, but now it seems imperative that action be brought and fought for until something definite is accomplished, useful in their end.

Our old newspaper friend, who has done so much for the Glades, Joe Hill, editor of the Post-Times, was out at the Water Control hearing as an interested listener. He must have heard well for he produced a swell story for his paper and its readers.

Asked Sam Chastain, of the Chastain Farms, up at Sand Cut how many beans he was putting out. "Hub," he replied, "I never estimate acreage, we just start in planting beans and keep it up day after day, and let the profit and loss show up at the end of the crop season, sometimes its favorable and sometimes not so good." Chastain not only does in vegetable growing but he also has cattle and pigs running over his ranch acreage.

The Glades area must be a profitable one for insurance underwriters, both life and fire, for I am told that there are not less than 25 agents in the area who make a living by solicitation of all types of insurance coverage. Agents admit that the negroes are big patrons along sick, accident and funeral benefit insurance and keep policy payments up if they fail to meet other obligations.

GRASS CHECKS

Continued from page one
Wheat. All farmers who planted such crops, should report the area planted and turned over to the County Agent's office in West Palm Beach. This report can either be made in person or by mail. No payments will be made for turning over new crops of weeds or grass.

"The second type of farmer interested in the 1945 program is the cattle owner planting or maintaining pastures. In order to qualify for payments under the pasture program, a letter must be written to the Agent at the County Agent's office in West Palm Beach, stating that the farmer wished to participate in the 1945 pasture program, and designating the sections in which this pasture work will be conducted. Before a farmer can enroll in the program, this letter must be on file. As is generally known, payments are made for planting permanent pastures of various designated varieties of grass, for applications of certain fertilizers, for mowing, for construction of shallow field ditches, etc. Anyone interested in the pasture program, will be sent complete literature on the practices when the above mentioned letter is received in our office."

ODD FELLOWS

(Continued from page one)
der and work for the projected lodge. Petitions will be signed at that time, a new lodge organized, and temporary officers selected. Deputy Grand Master James Dawson named Ray Whitlock, Ed Barber, and Judge J. M. Clechill as a local committee on arrangements for this meeting. A sufficient number of former members of the order have been secured to permit the temporary organization.

At a later date, when the temporary charter has been granted by the Grand Lodge, the Grand Master and his staff, along with visitors from near by lodges, will gather here for the instituting of the lodge and it will be a real gala affair, featured by a barbecue at noon.

CAVEAT
EMPTOR!

For CENTURIES that simple Latin phrase . . . "Let the buyer beware" . . . has guided astute men in their outlay of money. Now let's think about it in the terms of your future plans . . . as they pertain to Air Conditioning.

Knowing that Carrier Air Conditioning has been and still is in the service of our country, the far-seeing business and professional men have already included Air Conditioning in their plans for tomorrow. They are content to wait for the time when the Air Conditioning equipment they need will be released by the government and will come to them with all the modern improvements . . . perfected during the years when constant research was needed to meet the demands of war in order that Air Conditioning would function efficiently

and economically in every climate and under every imaginable condition.

Now what we are getting at is simply this—regardless just a little while longer. Wait for the time, soon to come, when you will know that the Air Conditioning equipment you buy will be the newest, most efficient and most economic equipment available.

The Belcher Industries will fill orders in sequence just as soon as the equipment is made available by the government. A deposit now will insure you priority of delivery and installation of Carrier Air Conditioning . . . the system that provides clean, evenly distributed, draftless air . . . of precisely controlled temperature and humidity — day in and day out — summer and winter.

The Nucleus of a
New Textile Industry
in Florida!The Everglades Region
Is Particularly Suited
To Raising RAMIE!

Ramie, the wonder fibre, can be raised successfully in the Everglades. The requirements of soil, climate and rainfall are such that three crops a year can be raised. Hundreds of acres of ramie have been planted in the last few years which, before long, should be fully producing.

Ramie has hundreds of potential uses in the textile industry.

Ramie is a superior and highly versatile fibre. It is durable, flexible, absorbent, non-shrinking and non-mildewing. It is possible to make ramie fabrics ranging from the most durable rags to cossetamer wearing apparel, all with the luster of finest silk. Clothing, warm in winter and cool in summer, household napery, such as sheets, marine cordage, fish lines, nets, sails, parachute harnesses, upholstery, non-linting handkerchiefs, and durable paper have all been made from ramie. Ramie meal is a valuable by-product, especially to Florida's growing livestock industry.

Strongest natural fibre known
Ramie fibre, when dried and cleaned, is practically pure cellulose, ranging between 92 and 95%. Because its cellulose crystals lie parallel to the fibre axis, it is far stronger than other textile fibres. In tensile strength, it is four times that of flax, eight times that of cotton and three times that of hemp. It is eight times stronger than silk. It exceeds flax and cotton in elasticity and torsion.

Our investigations indicate that the profit possibilities in ramie growing and processing in Florida merit your careful and immediate investigation. For more details about ramie, contact your Florida Power & Light Company manager.

FLORIDA POWER & LIGHT COMPANY

INVESTIGATE NOW This Growing, Post War Opportunity!

WHY
RAMIE?

1. It is a superior and versatile fibre.
2. It can be grown successfully in the Everglades.
3. Recent experimentation has apparently proved previous statements made in promoting.
4. Its high cellulose content makes it suitable for making high grade paper.
5. It is highly absorbent and dries quickly; can be spun and woven on already established textile machinery and can be carded along with wool.
6. It takes commercial dyes well; is easily dyed; is easy to wash and stains can be removed with almost ease.
7. Its product, a ramie meal, is a valuable by-product.
8. It offers great opportunities in the post war era, both agriculturally and industrially.

The Nation's New
Post War Opportunity

RAMS BEAT

(Continued from page one)
to lose the ball on a fumble.
Joe Cherry showed prowess of his educated foot when on four occasions he kicked the ball for long distances, twice into the coffin corner.
Harrell, a first year player, surprised everyone by his excellent play and he will bear watching the balance of this and coming years.
Beardon proved a good line

plunger and ground gainer and is a good side kick for Cherry.
Lake Worth High School band and Majorettes put on the customary drill between halves.
Jack Menges handled the loud speaker announcing in his well known manner.
Vivian Miller, of Chosen, was unfortunate to lose her purse but fortunate to have had an honest person find it and return it to the public announcing booth.
Both teams played "ironman"

feat, as the same line up played throughout the game, also one Trojan was removed on the first play with an injured arm.
Interest was shown by the Rams on the outcome of the game of other teams with which they have scheduled games.
Okcechobee defeated Stuart by a score of 7 to 0 and Dania wiped out Ft. Lauderdale bunch by a like score.
Everyone having a way of transit went out of the Glades for the Lake Worth game. A like exodus will be trekking to the game at Pahokee tonight for the Stuart game, which has been transferred to Lair Field.
The Rams demonstrated that they were not going to be kicked around by their opponents and that the aggregation is a good team. The Trojans found that line considerable of a stone wall to buck up against.

Fumbles and penalties were the errors which gave Lake Worth their first victory of the season, but by a much reduced score over the past two years.

BELLE GLADE

(Continued from page one)
civic asset and that the site would need to meet Post Office specifications as to size and location. That it also should be large enough to house numerous Federal agencies which have business in this section as this town is 40 miles away from the county seat town where such sub-agencies are usually located. Charles Fontaine was named to head a committee to conduct site negotiations. Postmaster Farnall commended the quick action of Congressman Rogers in getting the city on this preferred Federal building list, saying "that it was sure quick and efficient work."

The housing problem came up for extended discussion for with-out relief in this manner it was deemed that our city could not expand. Jay Sample came up with a proposition which looked good. He suggested that a Community Housing Corporation be formed, with stock subscribed by merchants, packers and other interested parties, for the purpose of renting or buying movable army or naval trailers which will soon be available for group and individual purchase. Ground work for such a corporation is to be undertaken by the Chamber with Sample as the chairman.

The Chamber also named Thomas Bringer as its representative to an organization which is looking forward to the erection of some kind of a memorial to the Service men from this area in connection with other civic clubs and the city commission.

The Chamber decided to meet twice a month, the first and third Monday nights of the month at 8:30 o'clock.

To provide a mail away booklet advertising the Belle Glade section and up-to-the-minute compilation will be formulated, printed and then distributed to applicants and elsewhere where such publicity literature will be of value.

FIGHT AND WHITE

Continued from page 1
and their planes, ranging along the coast of China and the empire are credited with a large share of the 361,530 tons of shipping sunk or damaged by this Wing.

S. J. BROWN

Brown has just received his discharge from the Army and has returned to Belle Glade to make his home here. He was a member of the 16th Infantry attached to the Medical Corps.

FARMERS BACK

Continued from page 1
ers have been making endeavor to secure for local use, trucks, farm machinery and other equipment which will not longer be needed by the services but find that all such equipment must be turned back into the hands of the Surplus Commodity Commission for disposal at its hands at stipulated times and places so that any immediate relief for the Glades from that source is out of the picture.

The agency states that it will likely have sufficient labor here up till January 1st, but must await Congressional action for any relief that comes after that date. Pahokee farmers and the packers are making strong demands to F. S. A. that the white camp there be turned back to original use, that of homes for white migrant workers, which are needed there.

Potato Loss Heavy

A farm writer from Miami, in a story concerning the Glades storm damage, says "Two hundred and twenty-five carload of seed potatoes have been delivered for planting, of which 150 cars had been planted, and of those planted, estimate is that 75 per cent will not bear fruitage."

Takes Over Store Room

It is announced that Mr. Collins, former city building inspector, plans to occupy the east store room in the new Seaboard block with a new shop handling electrical and household furnishing goods.

That's my business and its the only line of endeavor I am interested in, therefore I can concentrate my every effort to give you merchandise, service and prices.

R. M. HENDRY, Jr.

September 26, 1945

To The Citizens of Belle Glade, Fla.

I promised two years ago if elected I would faithfully and honestly serve all the people of Belle Glade; as I step down from the Mayor's seat tonight it is with a clear conscience that I have kept that promise:

It has been a pleasure to work with the fine fellows who served on the Commission with me, and others who worked for the city.

I know that the new Commissioners who take office tonight will find the holdovers eager to carry their share of the load. My hat is off to you boys; so let's go and make a bigger and better Belle Glade.

Sincerely,

J. K. BAKER

WHAT YOU DO: put in clothes, set a dial, add soap.

WHAT THE BENDIX DOES: fills itself, tumbles clothes clean, thoroughly tumbles rinses, dries clothes ready for the line or dryer, cleans and empties itself, and turns off—all automatically! The Bendix takes only 4 sq. ft. of floor space, fits perfectly in kitchen, bathroom, utility room, laundry.

This new Bendix is a genuine postwar product—offering fourteen major improvements—an even more astonishingly versatile and helpful than its famous predecessor.

Obviously, the machines first received by us must be retained for demonstrating purposes. But within the next sixty to ninety days we expect to be making deliveries to the public in substantial volume.

Women by the hundreds of thousands have looked forward to this opportunity of confirming with their own eyes, the amazing things they have heard about this greatest of labor-savers for the homemaker. Their waiting is over.

LOOK UP YOUR NEAREST BENDIX DEALER. Go and see for yourself. Watch how every step at the laundering process—from soiled clothes to a fresh sweet wash, all ready for the line or dryer—is completely automatic. Note how it washes, rinses, damp-dries, empties—even shuts itself off—by mere setting of a dial—and without a hand ever touching water! Learn that every good word you've heard about this washday wonder is true!

Then—make your arrangement for the delivery of your Bendix. And do it quickly

EXCLUSIVE TUMBLE ACTION:

tumbles clothes through suds 60 times a minute, yet so gently that even fine fabrics launder beautifully
